

Sex and Relationship Education (SRE) – Year 2 and Year 3

Boys, Girls and Families

1. Pupils learn to understand and respect the differences and similarities between people

Pupils

- are able to define difference and similarity
- understand that boys and girls can do the same tasks and enjoy the same things, but that stories, TV and people sometimes say boys do this and girls do that

2. Pupils learn about the biological differences between male and female animals and their role in the life cycle

Pupils

- know that female mammals give birth and nurse their young
- can describe the biological differences between male and female
- understand that the creation of life requires a male and female

3. Pupils learn the biological differences between male and female children

Pupils

- identify and name biological terms for male and female sex parts
- can label the male and female sex parts with confidence
- understand that the male and female sex parts are related to reproduction

4. Pupils learn about growing from young to old and that they are growing and changing

Pupils

- can identify key stages in the human life cycle
- understand some ways they have changed since they were babies
- understand that all living things including humans start life as babies

5. Pupils learn that everybody needs to be cared for and ways in which they care for others

Pupils

- understand that we all have different needs and require different types of care
- identify ways we show care towards each other
- understand the links between needs, caring and changes throughout the life cycle

6. Pupils learn about different types of family and how their home-life is special

Pupils

- can describe different types of family
- identify what is special and different about their home life
- understand families care for each other in a variety of ways
